

BERKE TAYFUN AKSEKI

Rome, Italy | github.com/berketayfunakseki | berketayfunakseki@gmail.com | LinkedIn: [berke-tayfun-akseki](#)

PROFILE

Computer Science and Management student at LUISS Guido Carli (Rome) with hands-on experience in Python/Django development and data analytics (Excel/Power BI/KNIME). Comfortable working in teams and communicating results clearly through reports and presentations.

EDUCATION

Bachelor's Degree, LUISS Guido Carli
Computer Science and Management

Rome, Italy
Sep 2023 - Present

Selected coursework (grades): Statistics (30/30), Legal System in the Digital Age (28/30), Microeconomics (27/30), Mathematics (25/30), Algorithms (25/30), Data Analysis for Business (24/30), Business Law and ICT (24/30), Introduction to Computer Programming (24/30).

High School Diploma, Private Bilfen Anatolian HS

Izmir, Turkey
Sep 2018 – Jun 2022

SKILLS

Languages: Turkish (Native) | English (C1) | French (B2) | Italian (A2) | Mandarin (A2)
Technical: **Python** (Pandas, NumPy) • scikit-learn , **APIs**: FastAPI (REST) • Pydantic , **Dashboards**: Streamlit • Power BI , **Web**: Django • HTML/CSS , **Data**: SQL • cleaning & evaluation , **Dev**: Git/GitHub • Docker • CI (GitHub Actions) , **Tools**: KNIME • MATLAB

PROJECT EXPERIENCES

- **Regulatory RAG Assistant (FastAPI + Streamlit + FAISS)** - [Regulatory RAG Assistant](#)
- Implemented PDF/TXT ingestion, chunking, and semantic search using FAISS.
- Built a FastAPI backend for query + retrieval, with a Streamlit UI for interactive Q&A.;
- Added Docker support and GitHub Actions CI for automated checks.
- **Churn ML API Dashboard (Training + API + Dashboard)** - [Churn ML API Dashboard](#)
- Trained and evaluated a churn prediction model with reproducible scripts.
- Exposed predictions via a FastAPI endpoint and built a Streamlit dashboard for demos.
- **OralB Geo-Analytics — Campaign Optimization (KNIME + Power BI)** - [OralB Geo-Analytics](#)
- Group project: cleaned data, computed scoring logic, and analyzed targeting decisions.
- Delivered insights with a Power BI dashboard and documented the workflow.
- **Django CRUD + Auth Web App** - [Django CRUD + Auth App](#)
- Full-stack Django app with authentication and CRUD flows.
- SQLite-based models and clean UI patterns for rapid prototyping.
